

1/22/70

Dear Paul,

Your 1/18 on copies books:

Thanks for alerting me to the inaccuracy of my postage scales. I'll try and be more coareful. Sometimes, I suppose the envelope can catch on something.

By the time you get this you should have the co-ies of both PMs. They were copied in different places, but in each case, alas, where the people ate not as concerned as they should be in keeping the carbon in the condition in which it should be. They are the best I have. People who do this work commercially not only know the machines and their adjustment better, but they are more concerned about the finished product, so you are fortunate out there. Here, I have to get it done where I can without having to pay.

I have heard from Garry. Response enclosed. They are interested. His sec wrote for him, as I'd suggested in the second letter, a copy of which I sent you.

Many thanks for the extra copies. I'll let you know when I get them.

Unrelated: I've completed the additions to ch 18 but await hearing from Gary and JNS before trying to xerox. I'll send you the NCR copies of the additional when I can. But I want to xerox this and the appendix and the notes, so you will have all of it. I cannot do it on my machine because the paper is too old and it costs too much and I cannot now replace even out-of-date paper. I think maybe Bud will allow it.

Sincerely,
